

Chinese aerosol market roars ahead

Strong growth continues with 24% two-year jump...

The future remains bright for the Chinese aerosol market, with trends suggesting continued, stable long-term growth in the metal packaging industry, according to the Aerosol Committee of the China Packaging Federation. Overall aerosol product output in China totaled 1.7 billion units in 2013, a 24.3% jump over 2011's 1.37 billion.

The Committee reported that demand for aerosol packaging in personal care, food and automotive products is developing rapidly. Amid increasing population shifts from rural areas to urban ones, car ownership has risen.

Other effects of Chinese urbanization include a more streamlined supply chain, improved manufacturing facilities and a rise in e-commerce.

1.96 billion tinplate cans for aerosol products were produced in China in 2013, a 17.4% increase over 2011's total. Similarly, aluminum aerosol can production has increased 20% since 2011 to about 500 million units. Growth in valve output was more modest; 3.7 billion aerosol valves were produced, indicating a 4.8% increase since 2011.

According to the Committee, a major challenge faced by the Chinese aerosol market is cost increases due to rising labor expenses, slow innovation, competition from other developing countries, the high popularity of low-cost products and "environmentally-friendly pressure," among other factors. Overall, however, the market continued its rapid development in 2013, further cementing China as one of the world's largest aerosol producers. **SPRAY**

Note: The China Packaging Federation Aerosol Committee reports production figures every other year.

2013 Aerosol production in China

Tinplate aerosol cans	1.96 billion
Aluminum aerosol cans	0.5 billion
Aerosol valves	3.7 billion
Aerosol product output	1.7 billion

CPMC HOLDINGS LIMITED

CPMC—One of the biggest supplier of aerosol cans

- CPMC—core business division under COFCO (china oil and foodstuffs corporation) which is one of the fortune 500 companies.
- CPMC was successfully listed on the main board of the HongKong stock exchange on November, 16th 2009.
- CPMC equipped with 10 advanced tinplate can production lines and the world's most advanced monobloc can production line. The products are exported to Southeast Asia, Middle East, Australia and USA.
- The diameter of the tinplate cans are $\Phi 45$, $\Phi 52$, $\Phi 57$, $\Phi 65$. The diameter of the monobloc can are $\Phi 35$, $\Phi 40$, $\Phi 45$, $\Phi 50$, $\Phi 53$, $\Phi 59$, $\Phi 66$.
- The pressure proof are 1.2Mpa, 1.5Mpa, 1.7Mpa, 2.0Mpa.
- The company has passed the certifications of ISO9001, ISO14001: 2004, OHSMS18000
- DOT No. M5933, M5934, M6271
